

Manufacturing Technician (Mechanical Fitter)

A new opportunity has arisen for a Mechanical Fitter to join an innovative energy storage company.

Applicants are required to hold the relevant Visas/Work Permits.

Role will be based in Bathgate, with some travel to our Livingston office and may also require travel to our other sites.

About the role

You will report to the Manufacturing and Quality Manager and work side-by-side with the R&D, Product Engineering, Systems and Software and Test & Validation teams.

Critical to the role will be the positive impact provided during the manufacturing process through the relationships you build with engineering, balanced with the ability to lead mechanical manufacturing activities through formal engineering requirements/documentation. We are looking for an ambitious individual to grow with the company.

As a small and growing company, there is significant opportunity to shape the role and an expectation for both team and independent working.

Responsibilities

The role will involve the following responsibilities:

- Provide mechanical manufacturing expertise in the manufacturing/assembly of redT energy storage solutions
- Support Engineering during the New Product Development stage on next generation products
- Liaise with Quality and Manufacturing engineering to identify design/manufacturing improvements, cost reduction opportunities and ways to streamline & simplify the manufacturing process
- Represent manufacturing during engineering design reviews, providing feedback on potential manufacturing issues and identifying improvement opportunities at the design stage
- Provide manufacturing support to the Test and Validation team during system validation
- Participate in all Bathgate Manufacturing improvement initiatives
- Undertake duties in line with all Health and Safety procedures and guidelines. Keep manufacturing area tidy and clean and maintain tools, equipment, and storage areas in order to ensure compliance with safety regulations

Qualifications/Experience

- Suitably qualified mechanical fitter, (min NVQ level 2 working towards NVQ 3)
- 2yrs+ hands on experience in a manufacturing environment
- Excellent communication skills and the ability to lead manufacturing projects and articulate manufacturing issues across all levels of the organisation
- Must be able to show initiative, problem solver and work under pressure to tight deadlines
- Ability to work on own initiative with minimum supervision
- Right to work in E.U.

Remuneration

Competitive salary and benefits package
